

THE DATA SCIENCE & ANALYTICS INTERVIEW BOOK

1,160 questions. Worked answers.
Nothing typed by hand.

Most data science interview books give you a question and a paragraph. This one gives you the answer at three levels, because the gap between a pass and an offer is rarely knowledge. It is how the answer is built. Every code output in it was produced by running the code.

WHAT IS INSIDE

69A	Why This, Not That	60	75	Product Sense & Metrics	68
70	Excel, Sheets, VBA & BI	87	76A	Data Analyst & Scientist	75
71	SQL	108	76B	Business Analyst	95
72	Python & pandas	90	77	Data Engineering & Design	56
72A	Data Structures & Algorithms	62	78	Automation & Integration	45
72B	Data Cleaning & Wrangling	100	79	GenAI, LLM & MLOps	55
73	Statistics & Experimentation	56	80	Architecture & Leadership	68
74	Machine Learning	56	81	Behavioural, HR & Offers	79

SIXTEEN BANKS, FRESHER TO SENIOR

1,160

EVERY QUESTION GIVES YOU

- A one-line answer to recall under pressure
- Three tiers: what passes, what is strong, what earns the extra point
- A level and the roles that ask it
- Follow-ups and the red flag that loses the room
- Where to learn it, by chapter and section

WHO IT IS FOR

Anyone preparing for a data science, analytics or business-analyst interview in India: analyst, data scientist, data engineer, analytics engineer or BA, from a first job to a senior move. With take-home assignments and mock interviews to run end to end.

WHAT IT DOES NOT DO

It makes no promise about salaries, placements or outcomes, and it names no employer. It is a question bank and a method. The work is still yours.

START HERE

The Interview Book

1,160 questions with worked answers. This book.

ADD-ON

The Volumes

Theory, Practical and Implementation, with practice files for every tool.

ADD-ON

Projects

Ready-made portfolio projects with real, messy data. Sold separately.
