

THE INTERVIEW READINESS BOOK • DATA SCIENCE & ANALYTICS

1,226 questions. Worked answers. Nothing typed by hand.

Most data science interview books give you a question and a paragraph. This one gives you the answer at three levels, because the gap between a pass and an offer is rarely knowledge. It is how the answer is built. Every code output in it was produced by running the code.

WHAT IS INSIDE

68A	Rounds Nobody Prepares For	66	75	Product Sense & Metrics	68
69A	Why This, Not That	60	76A	Data Analyst & Scientist	75
70	Excel, Sheets, VBA & BI	87	76B	Business Analyst	95
71	SQL	108	77	Data Engineering & Design	56
72	Python & pandas	90	78	Automation & Integration	45
72A	Data Structures & Algorithms	62	79	GenAI, LLM & MLOps	55
72B	Data Cleaning & Wrangling	100	80	Architecture & Leadership	68
73	Statistics & Experimentation	56	81	Behavioural, HR & Offers	79
74	Machine Learning	56			

SEVENTEEN BANKS, FRESHER TO SENIOR

1,226

EVERY QUESTION GIVES YOU

- A one-line answer to recall under pressure
- Three tiers: what passes, what is strong, what earns the extra point
- A level and the roles that ask it
- Follow-ups and the red flag that loses the room
- Where to learn it, by chapter and section

WHO IT IS FOR

Anyone preparing for a data science, analytics or business-analyst interview in India: analyst, data scientist, data engineer, analytics engineer or BA, from a first job to a senior move. With take-home assignments and mock interviews to run end to end.

WHAT IT DOES NOT DO

It makes no promise about salaries, placements or outcomes, and it names no employer. It is a question bank and a method. **The work is still yours.**
